Work Experience

Company : **Renault Nissan Technology and Business Control India Private Ltd.**
Designation : **Senior Engineer**
Period : Jan 2019 –till date

Project 1

Project : **SIMAP (Information System for Process Control)**
Period : Jan 2019 to till data

Description : SIMAP is a global quality tool to check conformity of the vehicle. Scope of the application is getting extended from Assembly to Power train [Engine module]. Samples taken by Robot or Manually of each characteristic for every interval of time uploads into tool to generate different types of reports based on the profile and provided input. It allows users to upload part image and assign the characteristics to each part of the vehicle and visualize characteristics assigned in a single view.

I worked on the front end prominently using **Angular 6** with **TypeScript** for Characteristics creation and Alert Module is one of the main key flows of the application.

Company : **Infosys Limited**
Designation : **Senior Software Engineer**
Period : Nov 2014– Jan 2019

Project 2

Project : **Boeing**
Period : Jun 2018 to Jan 2019

Description : The world largest aerospace company and leading manufacturer of commercial jetliners, defence, space and security system. Developed portal named cactus for creating training manuals for end users.

I worked on the front end prominently using **Angular 4** with **TypeScript** for course and lessons one of the main key flows of the application.

Project 3

Project : **BEACON [DBHDD PORTAL]**
Period : Feb 2017 to Jun 2018

Description : The Georgia Department of Behavioural Health and Developmental Disabilities provides treatment and support services to people with mental health challenges and substance use disorders and assists individuals who live with intellectual and developmental disabilities.

I worked on the front end prominently using **Angular 4** for the Individual Registration, Eligibility and one of the main key flows of the application.

Project 4

Project : **Blue Shield of California**

Period : July 2015 to Dec 2016

Description : Developed a web application which caters as a dashboard for the operations in the team under various Facets towers. A portal to track, manage, view and modify incidents, reports and also provides an automation for report generation and E-mail notification to business.
